Assignment 3 - Divide And Conquer Algorithms
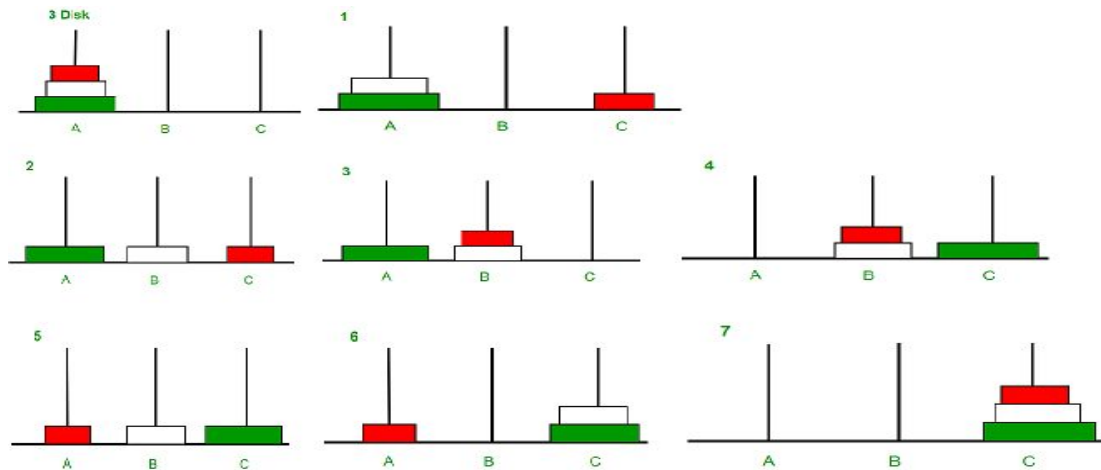

Problem 1: The Closest Pair Problem

Problem 2: Optimal Array Multiplication Sequence

Problem 3: TowerGame

mathematical puzzle where we have three rods and n disks. The objective of the puzzle is to move the entire stack to C rod, obeying the following simple rules:

- Only one disk can be moved at a time.
- Each move consists of taking the upper disk from one of the stacks and placing it on top of another stack i.e. a disk can only be moved if it is the uppermost disk on a stack.
- No disk may be placed on top of a smaller disk.

TestCases and Output format

```
Input : 2
Output : Disk 1 moved from A to B
         Disk 2 moved from A to C
         Disk 1 moved from B to C

Input : 3
Output : Disk 1 moved from A to C
         Disk 2 moved from A to B
         Disk 1 moved from C to B
         Disk 3 moved from A to C
         Disk 1 moved from B to A
         Disk 2 moved from B to C
         Disk 1 moved from A to C
```
